devonuttley.com

I am an experienced, ambitious professional with over 20 years working experience in UI/UX, web, mobile, smart TV application development, user-centered design, user accessibility and project management.

My goal is to attain a mid to upper-level UI/UX designer position which compliments my design skills, technical experience, leadership abilities and vision for the end user of web/mobile/IOT applications.

EXPERIENCE

Wunderman Thompson Apps, Remote Design Lead

September 2021 - November 2023

- Guided client stakeholders and internal staff to establish scopes of work and app requirements
- Managed the complete lifecycle of app design from initial client discussions, user interviews to post-launch analytic reviews
- Routinely presented research-focused designs and user flows to large groups of C Suite stakeholders
- Created personas, sketches, wireframes and prototypes
- Primary contact bridging design and technical implementation teams

OTHER EXPERIENCE

Throughout the last 20+ years I have maintained contract work for various clients, the scope of which includes planning, wireframing, designing, developing, and deploying several dozen websites.

In addition to my digital work, I am a student at the construction process, including carpentry, concrete, and electrical skills. I am passionate about building things from the ground up, whether it be in the digital world or in the physical world around us.
